

Anuj

Front-End Developer (React.js | React Native)

Contact

anujjaglan9423@gmail.com

+91 9896979805

*Dynamic and results-driven Front-End Developer with **3+ years** of hands-on experience in building responsive, cross-platform web and mobile applications using **React.js, React Native, Redux, and Tailwind CSS**. Adept at delivering performant, scalable UI solutions and integrating RESTful APIs. Skilled in Agile methodologies, code optimization, and delivering seamless user experiences across devices. Known for strong collaboration with backend and design teams to translate product visions into interactive applications.*

Professional Experience

Front End Developer @ Think Straight IT LLP

AUG 2022 – PRESENT

- Developed and deployed modern web and mobile apps using React.js and React Native.
- Built **cross-platform mobile applications** with React Native, improving user engagement and reducing development time by 40%.
- Designed responsive interfaces with **Tailwind CSS** and custom UI components.
- Integrated **RESTful APIs** and managed state using Redux and React Query.
- Implemented performance optimizations with React Hooks and lazy loading, improving load time by up to 35%.
- Collaborated in Agile sprints with backend and design teams, participating in code reviews and CI/CD pipelines.

Key Projects

MOBILE PAYMENT APP – REACT NATIVE

- Built a cross-platform app for tenants to complete onboarding, upload KYC, and make payments.
- Used WhatsApp integration, Formik for forms, and Firebase for real-time data.
- Tech Stack: React Native, Redux, Axios, Firebase

KIPINN – WEB PAYMENT PLATFORM

- Responsive web system for rent onboarding and payments. Improved user completion rate by 40%.
- Tech Stack: React.js, Redux, Tailwind CSS, React Query, Formik

CAMPAIGN MANAGEMENT DASHBOARD

- Created admin panel to manage marketing campaigns, users, and reports.
- Optimized API calls, decreasing response times by 20%.
- Tech Stack: React.js, Redux Toolkit, React Query

PANUKA CMS (AGRITECH, AFRICA)

- Custom CMS for farming data visualization and reporting.
- Improved loading speed by 25% using dynamic imports and lazy loading.
- Tech Stack: React.js, Tailwind CSS

SUPPLY CHAIN & SHIPMENT TRACKING PLATFORM

- Built UI for cargo shipment and procurement processes with real-time tracking and inventory data.
- Tech Stack: React.js, Redux, Chart.js

Technical Skills

- **Languages & Frameworks:** React.js, JavaScript (ES6+), HTML5, CSS3, Bootstrap, Tailwind CSS
- **State Management:** Redux, React Query
- **API Integration:** Axios, REST APIs
- **Tools & Platforms:** Git, GitHub, Webpack, NPM
- **UI/UX & Design:** Responsive Design, Figma, Wireframing
- **Testing:** Jest, React Testing Library
